

Serif Italic

Looks like *ø* lacks some volume in the left upper "corner"

The 2 slants forwards too much, IMO

A little too heavy?

Thinner?

The bottom curve is somewhat off, probably the extreme needs to move to the right

The left upper quadrant looks a bit deflated?

For the c-elements of the ж I'd use a slightly more vertical contrast axis (well, axis of the slant angle), similar to the one in o

It seems the 3 resists the slant angle a bit, I'd move the "head" subtly to the right

There is something slightly off in the middle: I think the green point is sitting too high up, and the red ones are kindof resisting the slant angle.

The visible tapering of the bottom diagonal is also bothering me a bit, even if it is consistent with the Latin k

These parts should also be compacter, IMO.

A bit bigger bowls? And maybe the joint more like in 4? I think in Serif Italic it would be most justified!

See Black about the ъ

No serif there!

Altogether *ѣ* looks a tad too dark in text. I'd make joints thinner

The curvature and character of the curve in *ч* looks too foreign, in Italic it can be much closer to the one in u

I'd make the "head bigger, and the leg more slanted"

I would make the joint "sharper" to make it somewhat less bulky

A B C D E F G H I J K L M N  
O P Q R S T U V W X Y Z

A tad wider  
Shoulder

Lower jaw bit too big

I'd apply the adjustment I  
suggested for teh Upright Ч  
also here (Looking at the U  
for comparison)
